FENCING FABRICS

Attractive, durable and lightweight

OUR COMPANY

TenCate develops and produces materials that function to increase performance, reduce costs and deliver measurable results by working with our customers to provide advanced solutions.

TenCate Industrial Fabrics is the leading manufacturer of woven, nonwoven, and specialty knitted industrial materials. Our fabrics are used around the world in trampolines, commercial greenhouses, truck covers, tennis windscreens, pool covers, and a wide variety of other applications.

FENCING FABRIC

TenCate's versatile fencing fabrics are primarily used as tennis court windscreens and for baseball fields. Fencing fabric is also ideal for use in privacy screening, crowd control, and as shade for livestock. TenCate Industrial Fabrics manufactures tennis windscreen fabrics in two distinct styles in six and nine foot widths:

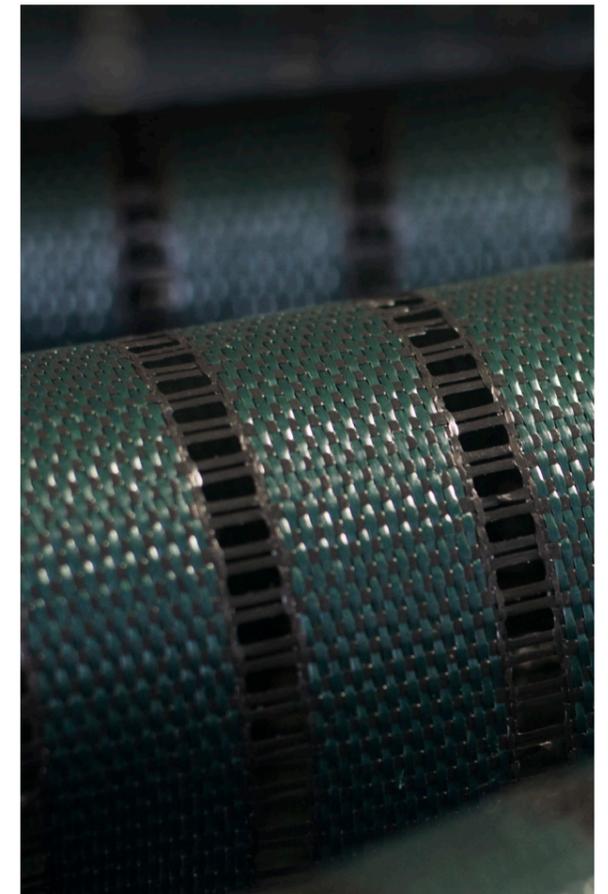

- › **Woven lathe-leno** (open mesh) contains a leno lockstitch and is available in green, royal blue and black.
- › **Woven closed**, plain weave mesh available in green and black. It provides optimum windbreak and density.
- › Also available is **knitted** fabric in dark green at 183 cm (6') and 274 cm (9') widths, which can be installed without fabrication.

THE DIFFERENCE TENCATE FENCING FABRICS MAKE:

- › Attractive colour adds aesthetic value
- › Durable fabrics hold up against all types of elements
- › Lightweight mesh fabric allows for convenient installation
- › Wide width availability reduces fabrication and provides seamless 274 cm (9') panels.
- › Mildew and rot resistant to maintain lasting strength
- › Non-absorbent to protect against water damage
- › High tensile strength adds to product durability
- › UV resistant to block sun damage

OUR SERVICE

TenCate offers comprehensive service that includes assistance during design and specification. With extensive knowledge and great customer service, TenCate makes the difference.
